

ShopEase Return Policy

Document Type: Customer Support Policy

Company: ShopEase

Policy Version: 1.0

Effective Date: September 30, 2026

1. Overview

ShopEase allows customers to return eligible products when they meet the conditions described in this policy. Customers should check the return eligibility of an order before initiating a return.

This policy applies to purchases made through ShopEase.

2. Return Eligibility

An eligible product can generally be returned within **30 calendar days from the date of delivery**.

To be eligible for a return:

- The product must be in acceptable condition.
- The product should not show signs of misuse or intentional damage.
- The product should include accessories and components that were provided with the original order, where applicable.
- Product packaging should be retained where it is required for safe return processing.
- The product must satisfy any category-specific return conditions listed by ShopEase.

The return eligibility shown for a specific order takes precedence over the general return period when additional product-specific conditions apply.

3. Products That May Have Different Return Conditions

Some products may have different return or replacement conditions because of their nature.

Examples include:

- Personal-use products
- Certain health and hygiene products

- Customized or personalized products
- Products with activation or registration requirements
- Products sold with category-specific warranty or replacement conditions

Customers should check the return information associated with the individual product or order.

4. Non-Returnable Situations

A return request may be rejected when:

- The return period has expired.
 - The product has been used in a way that makes it unsuitable for resale.
 - The product has been intentionally damaged.
 - Required accessories or components are missing.
 - The product does not match the item originally purchased.
 - The product is excluded from returns according to its category-specific conditions.
 - The returned item fails the applicable quality or eligibility inspection.
-

5. Damaged Products

If a product arrives damaged, customers should report the issue to ShopEase support as soon as possible.

Customers should provide:

- Order ID
- Description of the damage
- Photographs of the product and packaging when requested
- Any other information required by the support team

ShopEase may review the information before approving a return, replacement, or another applicable resolution.

6. Incorrect or Missing Items

If a customer receives an incorrect product or discovers that an expected item or component is missing, the customer should contact ShopEase support with the relevant order ID and a description of the issue.

ShopEase may request additional information to verify the issue before providing a resolution.

7. How to Request a Return

Customers can request a return by following these steps:

1. Open the relevant order in the ShopEase account.
2. Select the eligible product.
3. Choose the return option.
4. Select the reason for the return.
5. Provide any requested information.
6. Submit the return request.
7. Follow the return instructions provided by ShopEase.

The return request is subject to eligibility verification.

8. Return Pickup and Shipping

When a return is approved, ShopEase may provide return pickup or return instructions depending on the product, delivery location, and applicable return process.

Customers should package the product securely and include the required components.

Return pickup availability may vary by location.

9. Return Inspection

Returned products may be inspected after they are received.

The inspection may verify:

- Product condition
- Product identity
- Included accessories

- Signs of misuse or damage
- Compliance with the applicable return conditions

A refund or other resolution may depend on the result of this inspection.

10. Refund After Return

A return and a refund are related but separate processes.

Approval of a return does not necessarily mean that the refund has already been completed.

After the returned product is received and the applicable checks are completed, the refund is processed according to the ShopEase Refund Policy.

Customers can contact ShopEase support if they need information about the status of a refund.

11. Order-Specific Eligibility

The general ShopEase return policy does not determine the status of every individual order.

For questions such as:

- "Can I return order ORD1001?"
- "Is my order eligible for return?"
- "When does my return period expire?"

the system should check the order-specific information available for that customer.

The ShopEase support assistant must not assume that an order is eligible for return without checking the relevant order information.

12. Policy Questions vs. Order Questions

General policy questions can be answered using this document.

Examples of general policy questions:

- "How many days do I have to return an item?"
- "What are the return conditions?"
- "How do I request a return?"
- "What happens after I return an item?"

Questions about a specific customer's order require order information.

Examples:

- "Can I return ORD1001?"
- "Is my order still eligible for return?"
- "When was my order delivered?"

The ShopEase support assistant should use the appropriate business system or tool for order-specific questions rather than inventing information.

13. Contacting Support

If the return policy does not provide enough information to resolve a customer's issue, the customer can contact ShopEase support.

Support may request the order ID and additional information before determining the appropriate resolution.

14. Policy Updates

ShopEase may update this policy when its return procedures or product-category requirements change.

The policy version and effective date should be checked when determining which policy applies.

15. Examples

Example 1 — General Return Period

Customer: "How long do I have to return an eligible product?"

Policy: Eligible products can generally be returned within 30 calendar days from the date of delivery.

Example 2 — Damaged Product

Customer: "My product arrived damaged. What should I do?"

Policy: The customer should contact ShopEase support as soon as possible and provide the order ID and requested information about the damage.

Example 3 — Specific Order

Customer: "Can I return order ORD1001?"

Policy: This cannot be determined from the general return policy alone. The system must check the order-specific return eligibility.

Example 4 — Refund

Customer: "I returned my product. Where is my refund?"

Policy: Return processing and refund processing are separate. The customer's refund status must be checked using the applicable refund information.
